

New Lean Manufacturing Apprenticeship Launched by Elevated Knowledge for 2024

Elevated Knowledge, a renowned engineering training and apprenticeship centre based in Stockport and operates on a national basis, is excited to announce the launch of its innovative new Lean Manufacturing Apprenticeship programme for 2024. Designed to integrate seamlessly into the workplace, this comprehensive 13-month course aims to revolutionise manufacturing practices by focusing on efficiency, waste reduction, and continuous improvement.

Programme Overview

The apprenticeship is skilfully delivered within the company's premises, ensuring minimal disruption and maximum relevance to the workplace. It arms learners with vital competencies in Lean Manufacturing, emphasising the importance of efficient operation, waste minimisation, and the continual enhancement of processes.

Participants will be awarded the City & Guilds Level 2 Diploma in Manufacturing (Knowledge & Skills) (4500-12), a qualification that recognises their newfound expertise in this critical field.

Funding and Flexibility

The programme is financially accessible to a wide range of businesses. Levy payers can fully fund the apprenticeship and its qualifications using their levy, while non-levy payers contribute just 5% of the total cost, with 95% of the course funded.

Recognising the diverse schedules of manufacturing workers, Elevated Knowledge has designed flexible learning modules, including bi-weekly online tutor sessions, to accommodate shift patterns. Every eight weeks, detailed teaching and assessment plans are drafted, ensuring a structured and relevant learning experience.

End Point Assessment

The apprenticeship concludes with a multifaceted end-point assessment, including workplace observation, a portfolio of evidence, and a comprehensive multiple-choice test. This rigorous evaluation ensures that learners have thoroughly grasped the lean manufacturing principles and are ready to apply them in real-world scenarios.

Benefits for Employers and Learners

Employers stand to gain significantly, with increased productivity, cost savings, quality improvement, enhanced employee engagement, and a qualified workforce. Learners, on the other hand, will benefit from skill development, career advancement opportunities, professional recognition, personal growth, and a sense of value from their company.

Enrolment and Contact

Enrolling your team is a straightforward process. Interested parties are encouraged to contact Elevated Knowledge for guidance through the enrolment process, which can be tailored to specific company needs.

Conclusion

Elevated Knowledge's Lean Manufacturing Apprenticeship is set to transform the manufacturing landscape. It not only offers an opportunity to enhance the skills of the workforce but also to elevate the manufacturing processes, creating a more flexible, responsive, and efficient production system that delivers exceptional value to customers.

Enrolling your team is simple, contact us and we will guide you through the enrolment process, tailoring the programme to suit your specific requirements.
