

National Vocational Qualifications (NVQ's) 2025

ELEVATED
knowledge

Putting the Learner at the

Mechanical Engineering –

Covering essential mechanical principles, machining, fitting, and assembly to enhance precision engineering skills.

Electrical Engineering –

Designed for electricians and electrical engineers, focusing on fault finding, installation, and maintenance of electrical systems.

Maintenance Engineering –

Ideal for multi-skilled maintenance professionals, this NVQ covers both preventative and reactive maintenance techniques.

Welding & Fabrication –

A must-have for welders and fabricators, providing certification in MIG, TIG, and MMA welding, alongside fabrication techniques.

Our team are always on hand for you to discuss your pathways & options.

Elevate Your Workforce with NVQ Training

At Elevated Knowledge, we specialise in delivering NVQ qualifications tailored to the engineering industry.

Whether you're looking to upskill your workforce or help your employees achieve formal recognition of their expertise, our NVQ programs in Mechanical, Electrical, Maintenance Engineering, and Welding & Fabrication provide the perfect solution.

Take the Next Step in Professional Development

If you're an employer looking to invest in your existing team or an individual seeking career advancement, our NVQ programs provide the skills, knowledge, and certification needed to excel in the engineering sector.

Why Choose Elevated Knowledge?

- ✓ **Industry-Experienced Assessors** – Our team of highly skilled assessors come from engineering backgrounds, ensuring relevant and practical support.
- ✓ **Flexible, Workplace-Based Learning** – No need to attend college; our NVQs are delivered on-site to minimize disruption to production.
- ✓ **Nationally Recognised Qualifications** – Boost career progression and industry credibility with qualifications that meet employer and industry standards.

Heart of Everything We Do

What is involved in an NVQ?

When you enrol a learner on to an NVQ with Elevated Knowledge, you are making a solid investment in your team. Allowing your team member to gain accredited qualifications whilst not infringing too much on their productivity.

A typical Level 2 / Level 3 NVQ is delivered in your company and is assessed by a combination of:

Video submissions; Audio Submissions, Photographic Evidence and Write Up Reports submitted via the Onfile Learner Portal. Your learner will be allocated an assessor who will be there for your learner throughout the NVQ duration and arrange to visit your site at times that are convenient to you and your learner for training, advising and face to face assessing.

The duration of your NVQ is a guide to how long it can take but can be completed much quicker dependent on the learner and frequency of submissions. **See a typical timescale here** →

How do I enrol someone on to an NVQ?

Firstly, you will need to work out which Pathway you want for the NVQ. Each pathway is made up of Units, some are Mandatory Units which need to be taken and the others are optional units. The optional units are there for you to make the NVQ more bespoke to what you need. You can see the variations of the pathways by downloading the handbooks from the EAL website (<https://eal.org.uk/qualifications/>) or by asking your Training Provider.

Our staff are always on hand to assist and make suggestions if you are unsure about which options to take.

NVQ Duration & Prices 2025

We deliver Level 2 and Level 3 NVQ's in various disciplines of Engineering. The cost of your NVQ will depend on which level you decide on.

Level 2

Duration - 18
Months
£2,500

Level 3

Duration - 24
Months
£4,000

Our NVQ's all include the OneFile e-portfolio portal.

This software gives access to both you and your learner as well as the Training Assessor, meaning you can watch your learners progress at the click of a button.

Do you deliver Further Education Engineering Courses?

Elevated Knowledge have delivered BTEC & HNC to the highest standard for many years with our classroom based courses.

The level 3 BTEC is a perfect accompanying course for any engineer undertaking an NVQ.

The Higher National Certificate (HNC) Level 4 course is the perfect follow on course to any apprenticeship or L3 BTEC.

More recently, we have had a high demand for these courses to be delivered on a remote basis which we are proud to say we started to do in 2023 and it has been a great success! See website for further details of these options.

Commercial Short Courses:

If you want to enhance your knowledge in a shorter time, we have our range of short courses. These courses are ideal for anyone who wants to add to their skillset but does not require certification via a governing body such as City & Guilds/EAL.

Our robust range of training courses will provide delegates with the necessary knowledge, skills and safe working practices to enable them to safely undertake a range of professional tasks and enhance their careers. All courses can be delivered on site or at our dedicated training centre in Stockport.

ACCREDITED LEARNING

- ✓ City & Guilds
- ✓ Pearsons
- ✓ EAL
- ✓ LEIA

Our apprenticeships & NVQ'S are accredited by awarding bodies including:
